Dear Mr. Sower:

Thank you for your letter dated September 27, 1993, regarding the reclamation status of Crystal Peak Mineral Corporation's (CPMC), Sevier Lake Project. In your letter, you stated "Reclamation work at the Sevier Lake Project has been essentially completed in accordance with the reclamation outline provided by the Warm Springs Resource Area, BLM (Rex Rowley 6/29/93). The only remaining item on the list prepared by CPMC, BLM, and DOGM is the reclamation seeding (of) the access road and campsite area...The site is ready for a final inspection by DOGM and/or BLM personnel."

On October 12, 1993, an inspection of the reclamation at the Sevier Lake Project was conducted. Some of the observations made during the inspection are summarized below.

The borrow area located at the southeast end of the lake was reclaimed and seeded about four years ago. Subsequently, this area has been reseeded twice. No additional reclamation of the borrow area is required at this time.

The roads and campsite area were ripped and hay was crimped in as mulch. No seed was observed in these areas. The earth work done on the roads and campsite is acceptable and these areas are ready for seeding.

The main road/dike was breached at the lake shore and again by the inflow canal/pump and staging area. The main dike/road was graded down to between two and three feet above the natural lake bottom. The inflow canal (approximately 50 ft. wide, 20 ft. deep, and 6 miles in length) was left to fill in by sediment and salt naturally. Access to the canal was removed when the main road/dike was breached. The interior dikes of the evaporation ponds have started to degrade and erode. All structures, pumps and equipment have been removed.

0000

However, there is some trash and assorted debris that needs to be cleaned up and removed. Near the inflow canal/pump and staging area the following items were observed; PVC pipe, metal pipes, steel cable and wooden ties. Some of these items appear to have functioned as foundations for structures, pumps and other equipment. At the east end of the inflow canal, which parallels the main road/dike, there is a wooden gate and some plastic panels. Prior to closure, all of this trash and debris needs to be removed.

Please contact Nancy DeMille, Realty Specialist, at this office, regarding the termination of CPMC's Right of Way (U-58555). If you have any questions concerning this letter, please contact Rody Cox at (801) 743-6811.

Sincerely,

A handwritten signature in dark ink, appearing to read "Rex Rowley". The signature is fluid and cursive, with the first name "Rex" being more prominent than the last name "Rowley".
